

Motor Series **MTR9c**

Reversible Synchronous Motor - 1000 RPM

Application

Reversible power drive for special purpose m/cs, actuators, pumps, label printing machines, medical and optical equipment, vending machines etc.

Design

The MTR9c reversing synchronous motor with permanent magnet rotor. The rotating field is produced with a phase-shift capacitor and double-stator with coils thus ensuring extremely quiet running and smooth operation. Long life is ensured by the ball bearings. Compared to normal permanent magnet synchronous motor that operates on tin can principle, these motors are more efficient. At same time the temperature rise is significantly higher in this motor. MTR9c is operated with single-phase AC current.

The same motor version can be used at 50Hz and 60Hz.
